

ENDURANCE 870 LRC

Endurance
BY HAMPTON YACHTS

The Endurance 870 LRC is the latest evolution of Hampton's Endurance Series, and like all Endurance models, she exceeds USCG and IMO stability requirements for commercial open ocean service. This larger version takes that to a new level.

Refinements to the Hampton Hybrid Hull means the Endurance 870 will cruise comfortably at over 20 knots and at 8 – 12 knots, uses less fuel than most similar sized full displacement yachts.

Offered in Pilothouse and Skylounge configurations she comes standard with 4 generous ensuite staterooms, crew accommodations for up to 4, and very spacious public areas. An additional cabin aft can be used as an onboard office or spare stateroom for extra guests.

Hampton's signature quality of construction and finish are enhanced in keeping with this class and caliber of yacht. The result is the latest, most refined vessel of its type.
